

Brass Hose Swivel

Brass Swivel

There is something relaxing about watering with a hose. Unfortunately, the joy of hand watering can be short-lived when battling your hose. Hoses twist, causing unwanted delays and hassles. The constant pulling and twisting wears on your hose and you.

Dramm relieves this stress and brings back the joy of hand watering with the new Brass Hose Swivel.

The Brass Hose Swivel is a LIVE SWIVEL, allowing you to twist and turn while watering without the hose getting tangled and restricting your movements.

Hose-end accessories can now be moved in any direction without having to fight the hose. The Brass Hose Swivel is made in the USA from solid brass for a heavy-duty look and feel.

Specifications

3/4" Hose Thread
EPDM washers
EPDM O-ring

This tool gives great mobility in your yard!
