

Hydroponic Shear

Hydroponic Shear

Dramm's Hydroponic Shears feature a 3" long blade, allowing harvesting deep into plant canopy. Made from 316 Stainless, with a plastic & TPR rubber handle, the hydroponic shear is durable and lightweight. The blade extends throughout the body for strength, allowing for the use of

lightweight materials in the handle.

The Hydroponic Shear is available in a stainless steel blade or in a titanium coated blade to resist sap buildup. Purchase with the Dramm Cutting Tool Holster to store your shear.

Titanium Specification

Model #: 18033 Titanium
3" Stainless Steel Blade with Titanium Coating
