

SPRINKLERS 101

Knowing the different benefits of each sprinkler type will help in choosing the right sprinkler for your lawn.

4-Pattern Gear Drive Sprinkler

The gear drive sprinkler is similar to the Dramm impulse sprinkler but covers a smaller diameter. Four Patterns, with adjustable arc tabs, allow water coverage of any diameter, up to a maximum full circle of 40 ft. Easy to use. Pass-through on sled style base allows additional sprinklers to be connected to cover larger areas.

Oscillating Sprinkler

Oscillating Sprinklers are great for fast watering and covering medium to large areas. Oscillating Sprinklers cover up to 3,000 sq. ft. and provide gentle watering in a rectangular pattern.

Turret Sprinkler

Turret Sprinklers are great for small or large yards. Nine different patterns, ranging from circle to half-circle to rectangle and more, allow you the flexibility to water only the area you need watered.

SPRINKLERS 101

Knowing the different benefits of each sprinkler type will help in choosing the right sprinkler for your lawn.

Spinning Sprinkler

Spinning Sprinklers create a very fine mist spray, requiring less water for thorough watering. Works with water pressure as low as 20 psi. Great for "well" systems! Covers a diameter of 38 ft.

Impulse Sprinkler

TriPod, Circular, Stake or Wheeled base

The brass impulse sprinkler head has adjustable partial and full-circle patterns and waters an area of 70 ft. in diameter. Impulse sprinklers are designed to water closer to the ground, minimizing evaporation, and ensuring uniform watering.

Circular Base

Whirling Sprinkler

Whirling Sprinklers cover an area up to 38 ft. in diameter. Three spinning arms create a different look and feel than the typical sprinkler while providing thorough watering for your lawn.
