

Sprinkler	Flow Rate (GPM)	Diameter (Ft)	Coverage (Ft ²)	Recommended Use/Week*	
				Hours	Minutes
<u>Spinning</u>	3.50	37	1,100	3	20
<u>Whirling</u>	5.50	38	1,134	2	10
<u>Impulse</u>					
Min coverage	3.25	40	1,257	4	-
Max coverage	3.25	82	5,281	17	-
<u>Oscillator</u>					
Min flow	2.50	37	1,100	4	40
Max flow	4.50	62	3,000	7	-
<u>Four-Pattern Gear Drive</u>					
Flat	2.00	50	1,963	10	10
Fan	2.25	40	1,257	5	50
Mini	2.50	60	2,827	11	50
Large	3.00	60	2,827	9	50
<u>Turret</u>					
Outer Ring	6.00	26	525	1	-
Half Square	4.50	21	360	-	50
Narrow Rectangle	5.00	22	375	-	50
Circle	5.50	26	525	1	-
Half Circle	4.50	18	250	-	35
Rectangle	5.50	19	295	-	35
Pop-up Circle	5.00	20	300	-	35
Rounded Square	4.50	27	575	1	20
Square	5.00	27	575	1	15

* Based upon the rule of thumb of providing one inch of water to your lawn per week; total water delivery (rain + watering); warmer, more arid areas require more.

- These rates are based upon no other source of water received during the week.

- Recommendation based upon sprinkler coverage area: divide your watering area by sprinkler coverage and multiply that ratio to the recommended time.

- Flow rate and coverage area assumes water pressure from spigot is ~ 40 psi
